#### Open the Charging Cable Box:

As shown in the diagram on the right, first lift the latch upward, then rotate the cover horizontally to the left or right to open the product.

1. Watch Wireless Charger
2. USB-A Input
3. Type-C Input
4. Lightning & Micro Output
5. Type-C Output

#### Use the Charging Cable Box:

After connecting the input end to a power source, you can use the output end to charge your electronic devices. The cable box supports up to 15W wired charging and 2W wireless charging for watches. The actual charging power during use will depend on your power adapter and device.
